PROJECTS BUILT USING MVC FRAMEWORK:

- ❖ **AutoPilot** – This is an online ERP system made to help companies and offices in their internal business operations. AutoPilot has different kind of systems combined in a single web application, Systems like Timecard punches tracking, Philippine Payroll System, Ticketing System, Approval requests system, Recruitment system and many more.
- ❖ **TEFL Educators Website** - This is an online school made for people who wanted to teach English as foreign language. I, together with two more developers and a designer, led the development of this website. We started this project last July, 2014.
- ❖ **Dateinsky Website** - This is a dating site with thousands of users around the world. We, a group of three developers and one designer, started this project in March, 2013.
- ❖ **Media Specialist Association of the Philippines Website** - This is an organization site with an online registration system solely created for the Media Congress which took place at the Resorts World Manila last January, 2013. This was the first Media Congress hosted by the MSAP. I, as the backend developer and server admin, together with a designer developed this website.

PROJECTS BUILT USING VISUAL STUDIO:

- ❖ **MSAP Media Congress 2013 On-Site Registration System** - This is a local based registration system where a registration ID a member received from registering online on MSAP is used as his/her attendance confirmation.
- ❖ **Rogationist College Payroll System** - This is a computerized payroll system that I've developed when I was on my second year in BSIT course. This was implemented in our school and used by the school's accounting staff. With this system implementation I was awarded as "**Best In-Campus Case Study Developer**"
